# PRINCE ALBERT

the national joy smoke

Copyright 1919  
by R. J. Reynolds  
Tobacco Co.

Tossy red bags, tidy  
red line, handsome guard  
and half-pound tin ham-  
dors—and that classy,  
practical pound crystal  
glass humidifier with  
sponge moisture top that  
keeps the tobacco in such  
perfect condition.

PUT a pipe in your face that's filled cheerily brimful of Prince Albert, if you're on the trail of smoke peace! For, P. A. will sing you a song of tobacco joy that will make you wish your life job was to see how much of the national joy smoke you could get away with every twenty-four hours!

You can "carry on" with Prince Albert through thick and thin. You'll be after laying down a smoke barrage that'll make the boys think of the old front line in France!

P. A. never tires your taste because it has the quality! And, let it slip into your think-tank that P. A. is made by our exclusive patented process that cuts out bite and parch—assurance that you can hit smoke-record-high-spots seven days out of every week without any comeback but real smoke joy!

R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

## Reunions at Pen-Mar.

The annual reunion of the Reformed Church will be held at Pen-Mar on Thursday, July 17. The address will be made by Dr. Chas. E. Schaefer, of Philadelphia. There will be special musical features by Trinity Choir with J. H. Heberly, tenor soloist, from York, and soprano soloist, Mrs. Louise Smith.

The Lutheran reunion will be held at Pen-Mar July 24, when the speakers will be the Rev. Dr. R. D. Clare, St. Mark's Lutheran Church, Baltimore, and Prof. A. R. Wentz, Ph.D., of the Gettysburg Theological Seminary.

—Paul Spangler, of Bayonne, N. J., spent the week end at the home of his parents, Mr. and Mrs. George E. Spangler, near town.

## An Old Reliable Remedy for Children

Mother Gray's Sweet Powders for Children have been used by Mothers for over 30 years for feverishness, Bad Stomach, Teething Disorders and Headache. They break up colds in 24 hours, move and regulate the bowels and destroy worms. Get a package at your druggists to use when needed.

SPLendid OPPORTUNITY for men or women selling guaranteed hosiery. Handsome profits made in either full or spare time. Full line of men's, women's and children's up-to-date styles. Large commissions. Experience not necessary. Write PHOENIX HOSIERY CO., West Market Street Station, Philadelphia, Pa.

## NOTICE TO CONTRACTORS.

Sealed proposals for the repairing of two wooden truss bridges will be received by the Commissioners of the County of Adams, State of Pennsylvania, until 12 M. July 15, 1919, and publicly opened at the office of said Commissioners at 1 P. M. of same day.

Removing old wooden truss bridges, repairing abutments, raising wing walls and placing roadway in accordance to plans and specifications on the bridge in Abbottstown Borough, over Beaver Creek, and also on the bridge near Bendersville, on Laurel Road over Opossum Creek.

Plans, specifications and proposal blanks may be obtained at the office of County Commissioners, in Court House, at Gettysburg, Adams county, Pa.

No bid will be received unless a certified check for the sum of ten percent of bid, payable to the Commissioners of the County of Adams, is enclosed with each bid, as a guarantee if bid is accepted, a contract will be executed by the bidder within ten days after notice of award of contract.

The successful bidder will be required to give bond to the amount of contract, with security to be approved by the Commissioners of the County of Adams.

Each bid must be sealed and addressed to the Commissioners of the County of Adams, Gettysburg, Pa., and endorsed on the outside of envelope containing same, proposal for repairing of Abbottstown or Bendersville bridge.

The Commissioners reserve the right to reject any and all bids. By order of the Commissioners of the County of Adams, this 17th day of June, A. D. 1919.

H. B. SLAGLE,  
H. J. MARCH,  
E. C. KEEFER,

Commissioners of the  
County of Adams.

G. ALLEN YOHE, Clerk.

## CLEAR DALE.

Misses Edith Lemmon and Savina King, of near Mt. Vernon, were visitors of Miss Esther Bair.

Hobson Crouse, who returned from overseas some time ago, and has since been at Fort McKinley, Me., is spending a furlough with his parents, Mr. and Mrs. Charles Crouse.

Mr. and Mrs. Charles Crabbs, of near Pleasant Grove, were recent visitors of Mr. and Mrs. W. A. Crabbs.

Mrs. Paul Miller and children and Mrs. Calvin Myers and daughter Pauline, spent Tuesday at Hanover.

Miss Lula Rohrbaugh and brother Ralph, of Hanover, were visitors of Calvin Myers and wife.

—Miss Madeline Diehl has returned to her home on Hanover street after a visit with Prof. and Mrs. Earle K. Diehl, at Pottsville.

## Cases of Summer Complaint.

Stomach and Intestinal disturbances are frequently corrected by the use of Mother Gray's Sweet Powders for Children. They tend to Cleanse the intestinal tract and promote digestion. Used by Mothers for over 30 years. All druggists sell them.

## FOR SALE.

## A LOT OF GROUND

on South side of Hanover Street, on high ground, good location, improved with a well built substantial granite foundation. Ready for the brick work. Plans for the proposed house can be furnished if desired.

For terms call on

Wm. Arch. McClean.

## ARENDTSTVILLE.

During the heavy thunder storm last Sunday evening it blew down one dozen of large locust trees and some apple trees on George Gulp's farm near this place and Walter Taylor lost nearly all his hay by the heavy downpour of rain that flooded it.

Last Saturday the thermometer registered 102 in the shade in this place.

Mrs. Sadie Harmon and her daughter Edna were recent guests in the home of Mrs. Lizzie J. Raffensperger in this place.

Mrs. J. W. Dickson, of Hanover, is visiting her sister, Mrs. Ellen Zeuth, who has her home with her son-in-law, H. P. Mark, in this place.

Lloyd Warren and wife and their little child, and Miss Evelyn Long and Miss Mabel Mickle, of Harrisburg, are visiting in the homes of Mr. and Mrs. Geo. W. Warren and Harry C. Raffensperger.

Miss Phenio Bittinger has gone to West Chester.

Miss Mary Schlosser has returned from a visit with her sister, Mrs. Hunzberger, of Harrisburg.

P. E. Herting, of Harrisburg spent the week end at home of J. F. Herting.

Mrs. Jacob Klepper and daughter Miss Ella, spent last week at Mt. Holly and Aspers.

Those who spent Sunday with Mr. and Mrs. John Powell were Mr. and Mrs. J. Calvin Lochbaum and son Raymond, Mrs. Howard Saum and Lloyd Herring, of Orrtanna; Mr. and Mrs. John Hamilton and son of York Springs; Mr. and Mrs. Francis Thomas and daughters Maybell, Ruth and Pearl, of Wrensville; Mrs. Andrew Flickinger and daughters Grace, Mary and Eva, of Arendtsville.

Wesley V. Hummer, one of our soldier boys who was overseas has returned home to his parents, Mr. and Mrs. Washington Hummer.

—Dr. and Mrs. E. M. Baxter are spending some time at the home of Dr. and Mrs. W. A. Granville, College campus. Dr. Baxter was recently elected to the chair of Romance Languages of the College Faculty.

—Mr. and Mrs. Harry Saunders, who have been spending some time with Mrs. Fred. Thorn, Chambersburg street, have gone to Manchester, Conn., to make their home.

—Mr. and Mrs. David Menchey and sons, of Altoona, visited relatives in town this week.

# Going Camping?

Here Are a Few Necessities  
at Compelling Prices.

Folding Cots, Full Size, \$2.98

Folding Lanterns, 1.98

**HIP BOOTS** (You can't catch bass and trout without them). Sizes 8 and 9—\$6.00, size 10—\$5.25, size 11—\$4.50, size 12—\$3.75. These boots are extra fine quality and fully guaranteed—worth \$7.25, but we are overstocked on large sizes. Read those prices again.

**TENNIS SHOES** "Keds"—Little Children sizes 11 to 2-68c. Larger boys' and girls' sizes 2 to 5 1-2---78c. Men's sizes 6 to 11---88c.

**RAGS WANTED**

## URGES USE OF BOTH HANDS

French Authority Points Out the Value of Ambidexterity and Its Need of Cultivation.

France, in her earnest efforts to rehabilitate herself, has come to the wise conclusion that a child—a man or woman of the near future—who can use either hand with equal facility is almost twice as useful to the state as a "right-handed" or a "left-handed" person.

The Paris correspondent of the Journal of the American Medical Association writes of the attempt to encourage ambidexterity in French children.

"At the recent meeting of the Académie de Médecine Doctor Armaingaud pointed out the loss—military, civil and economic—which results from an artificial disability imposed on young children, and therefore on adults, in allowing them to use only their right hand, so that the left hand is used only as an auxiliary to the right.

"Speaking from a military point of view, Armaingaud called attention to the statement made by General Baden-Powell to the effect that no one could doubt the value of ambidexterity. If both hands were used equally by everybody instead of being used only occasionally, or by a few persons, as is the case today, the strength of the army would be increased notably.

"At this time, when the population of France is decimated by tuberculosis and alcoholism, and when the excess of births over deaths is less each year, it is not a matter of indifference to permit the population of France to continue what may be called a physiologic mutilation, one which may be made to disappear at will.

"Armaingaud proposed to the academy (1) to issue an appeal to the people of France, asking that the mothers, in the interest of the nation and in the interest of defense of the country, teach their children from the first to use both hands equally; (2) to request the minister of public instruction to make the equal use of both hands obligatory in all the primary and secondary schools; (3) to urge the foundation of a prize to be awarded annually to the teacher in France who has been most successful in carrying out this most desirable reform."

### Another Antigas Invention.

"Neutralizing ointment" is one of the latest war inventions. It is publicly revealed in an official description of the protective devices against gas attacks, now being issued to our troops.

The mask, with its contained chemicals for neutralizing any poisonous fumes that creep in, is familiar. But one so-called gas is a liquid, and because of its blistering effect the soldiers have given it the name "mustard gas."

When an area is drenched with this stuff the menace may persist for many days. The peril is not from the liquid itself. Mustard gas burns through the clothing, and makes painful wounds where the flesh is reached. The newly invented ointment must apparently be rubbed all over the body, as well as on face and hands, to protect the soldier when the enemy's bursting shells are spraying this horrible liquid gas about.—Providence Journal.

### Phones and Divorces.

Statisticians tell us that there is one telephone for every ninth person in this country and that every ninth marriage ends in divorce. The inference is obvious! The truth is out at last! Mr. Bell's ingenious little invention has joined the discredited ranks of the summer hammock, the cocktail, the fox trot, the roller skate, the ice cream parlor and the automobile. It is indeed a sorry state of affairs. One telephone for every ninth person, and on every ninth phone Cupid gets the busy signal forever! All too soon, alas, the wireless telephone will come into general use, and no home will be complete without its own little aerial runabout. O, statistician with thy pen, prepare to write new records then!—Thrill Magazine.

### Fish Leathers a Success.

The bureau of fisheries has received a sample lot of leather made from the skins of aquatic animals, including ray, shark, sturgeon, paddlefish and porpoise. It has received also articles made from such leathers, including men's, women's and children's shoes, as well as a belt, wallet, portfolio, brief case, etc. The manufacturers have established stations on the South Atlantic and Gulf coasts where supplies of raw material are obtained, and are producing from such sources a very high grade of leather suitable for nearly every purpose for which leather is used.

### The Rabbit Skin Industry.

Rabbit skins from Australia and New Zealand were among the largest offerings in the recent international fur auction at St. Louis. Half a million pounds of Australian skins and 50,000 pounds from New Zealand were sold for a total of \$335,000. Prices advanced 25 per cent over quotations last January, according to the official market announcement. The largest lots went to hatters and felt manufacturers.

### Hard to Catch.

"Waydown," a comedian in a colored regiment, was asked when he received his discharge if he would enlist in case of another war. His reply was: "Boy, if this man's country gets into another war they is gonna be two men missing—this nigger and the man what's chasing him."

## INTO THE UNKNOWN

Adventurers Irresistibly Lured to Untraveled Paths.

Martin Johnson and His Wife, Betting Out for the South Sea Islands, Explain Yearning That Calls Them to the Jungle Land.

To perpetuate the work that Jack London commenced and to film the unexplored mysteries of the jungle land—that vast unknown bush country of the South Sea Islands; to bring back photographic records of the habits, customs and mannerisms of tribes of which no white man has any knowledge; to endanger their lives in the tropic heat; to rub elbows with natives who are afflicted with leprosy, elephantiasis and other dangerous forms of contagious disease. All these items mean nothing at all to Martin Johnson and his pretty wife, Osa, who will leave New York Monday for Australia prior to invading the vast bush country, the unexplored interiors of which no white man has ever seen, writes the New York Sun. "I am anxious to go to the South Sea Islands because it is the nearest place to paradise on God's earth," said Martin Johnson.

"There are no strikes there, and it is a far safer place than in your little old New York. You may have Broadway if you like, but as for me I want to get away from your talk of 'Bolshevism' and everything that has anything to do with it at all. Pro or con it doesn't make any difference. And then again," Mr. Johnson continued, "there is the lure of discovering things no white man has seen. There is the great adventure about it. It is a yearning to get away from all this back here and be out in the great wild. It is the unfathomable unknown, the insoluble wilderness that lures me."

For Mrs. Johnson, this represents her second trip to the bush country, and she probably is the first woman from the United States to achieve such a distinction. The morality of the natives of the South Sea Islands is eulogized by Mrs. Johnson, who deprecates the morality of the white people, declaring the former to be of a higher standard. "No man covets his neighbor's wife there," she said. "Only in one instance did I see the penalty that a woman paid for alienating the affections of another woman's husband. They hanged her to a tree and executed her by slashing her body. A man lives three years with a woman before he marries her, in the Solomon Islands. In all that time he is never permitted to meet her in the open or mention his name to her, or she to him. Their coming together is decreed by order of the chief. The man is told who his mate is to be and where he can find her. In the dead of night he goes to her. If they like each other they are married in three years. If not, then their children are given over to the unmarried bride's or bridegroom's parents."

### Use of Chemical Products.

The interest in chemistry and chemical products has greatly increased in the United States owing to the fact that this country has been forced by the war to depend upon its own resources in this direction. The following uses are ascribed to these chemical products: In making soap and paper pulp, mercerizing cotton and purifying mineral oils, caustic soda is used; soda ash is necessary in the manufacture of soap and glass; silicate of soda (better known as water glass) is utilized in the manufacture of soap and in dyeing and printing calico, finishing cotton goods, preventing wool rot, bleaching jute and preserving eggs.

### Abolishing Trench Foot.

In the first winter of the war we used to hear much about "trench foot" due to standing long in the icy water and mud of the trenches. It was an inflammation that ranged from a sort of glorified chilblain to a condition of gangrene.

Col. George G. Nasmith, who commanded the Canadian Mobile Laboratory with the British expeditionary forces in France, says in the Medical Record that this vanished from the British army when it was discovered that the periodical removal of puttees, drying and chafing the feet and legs, covering them with whale oil and putting on dry socks was an absolute preventive.

### Boy Scouts.

The boy scouts' organization was founded in England in 1910 and introduced in the United States the same year. The object is to develop patriotism, discipline, courage and self-control in boys, as well as to put the Golden Rule into daily practice. The unit of the organization is the "patrol" of from six to eight boys; a "troop" comprises two or more "patrols" and the scoutmaster is the officer in charge of a troop. Lieutenant-General Sir Robert Baden-Powell was the father of the boy scout movement in England and Ernest Thompson Seton in the United States.

### Record Shorthand Writing.

Herman J. Stich, an American court reporter, wrote under most rigorous rules at the rate of 300 words a minute for five consecutive minutes, and then presented a transcript that with only two immaterial errors almost reached perfection, the percentage of accuracy being 99.9. Mr. Stich's performance is described as the finest in the history of shorthand.

## FERTILIZER MANUFACTURERS HAVE STANDARDIZED THEIR PRODUCT

The "Standards" for Wheat.

The wily and elusive fertilizer analysis has been roped, tied and branded. No more will it be free to bob up in forty different combinations to worry the perplexed farmer. If the plans of the fertilizer manufacturers can be carried out to a full finish.

Instead of a thousand or more analyses, each differing from its nearest relative but little, the manufacturers with the aid of the soil and crop experts of the different states have picked out a score or so analyses which will answer all needs, whether the crop be wheat or onions, and whether the soil be loam or clay.

This is a most important step in advance, and through the elimination of so many needless grades, each requiring its separate mixing, separate bagging, and separate listing and book-keeping, considerable money and no end of confusion will be saved all along the line.

The analyses selected for wheat are:

2-10-6	0-12-4
2-10-4	0-12-2
2-12-2	0-16-0
2-12-0	

Where no manure is used on wheat land, where wheat is planted late, or where land is not plowed for wheat, select from the first group.

Where plenty of manure is used, or where clover does well and is grown regularly and at short intervals in the rotation, select from the second group.

On sandy soils, where clover fails, or where no manure is used, use the higher potash analyses.

## WILL YOUR LAND GROW GOOD CLOVER?

All over the country clover is the foundation of good farming. Land that will grow good clover will ordinarily grow good corn, good oats and good wheat. Of course the growing of clover in itself makes the other crops produce more bountifully, but clover will not grow on poor land. The first requisite for clover is a sweet soil. A sour soil can be made

sweet by liberal use of lime, either in the form of ground limestone or burnt or hydrated lime.

If plant food is lacking in the soil it must be supplied before good clover, or any other crop, will grow. Some farmers try to supply this plant food through the long-time process of adding small amounts of manure and turning under a sod now and then. This plan may maintain fertility but it will seldom add fertility. The small crops grown on the impoverished fields do not supply sufficient humus-making material to get the soil into a loose, mellow condition, and since but little plant food is available from year to year no progress toward higher fertility is made.

It is poor business to spend years in trying to "bring up" badly depleted soil by cropping and cultural methods alone. There is nothing to build on. It is far cheaper in the end to buy good fertilizer at first and grow crops which will not only pay for the labor expended but will leave humus-making roots and stems in large enough quantity to improve the soil for next year's crop.

After a year or two of this latter sort of treatment most any soil, except the lightest sands or heaviest clays, will grow good clover.

## LITTLE CHANGED BY TIME

Dwellers in Mountains of Tyrol Live in Much the Same Way as Did Their Ancestors.

The mountains of Tyrol shelter one of the few remaining unspoiled peasant people of Europe—a people that wears a native costume, remembers its folk legends and follows customs centuries old.

The mountain Tyrolese are robust, hard-working folk. Life in the mountains demands work from every member of the household from daybreak until after dark. Then, on winter nights, the Tyrolese peasants play.

Dancing is a favorite amusement after the day's work, and this is all the more surprising because the dances of Tyrol are more strenuous than those of Russia or Poland. To swing your partner up to the ceiling, and to fall down and spring up again without using the hands for support are among the "steps" of a good dancer's repertoire.

While the dancing couple excitedly swing and caper, the others sing and play the zither, the favorite Tyrolese musical instrument. Original songs are in high favor, and also the old folk songs of princes and peasants, shepherds and huntsmen. The peasants sing lustily and well. Only a realization of tomorrow's work puts an end to the affair, and sends guests trooping home still whistling or humming the last song.

Whom You Question in it the pronunciation of a name in the history of a puzzling word, the location of a place, the meaning of a word, or the origin of a name.

## "POKER FACE" HAS ITS USE

Ability to Hide Emotion Will Frequently Be Found of Value in Game of Life.

Princeton is about to send 116 graduates out into the world. Some of them are whimsical young fellows, as would appear by the way they filled out questionnaires which asked them, among other things, what of most value had been received by them in their college course. One reflective senior avowed unblushingly that it was "his allowance." For others, "checks," "a poker face," "the art of bluffing," "learning how to loaf scientifically," were their acquisitions of highest worth.

The value of no one of these can be gainsaid, for most lives bring emergencies when any one of them may be of the highest use. There are some who may be skeptical of the advantages of the "poker face." Yet who can doubt the value on occasion of a poised, impassive, imperturbable countenance which gives no slightest hint of the hopes and fears it masks.

A physiognomy under complete control is almost essential to a diplomat, and this ability to hide emotions behind a changeless exterior goes far to give the Japanese envoys the reputation of being the best poised statesmen. Countenances which light up with emotion are more attractive. Wooden faces are never winning in the usual acceptance of the word. But they are the winning faces in two at least of the exciting games of life, diplomacy and poker.—Rochester Post Express.

### Danzig.

The old fortress of Danzig is rich in Napoleonic lore. It was here that the Man of Destiny failed to heed the intimations of a grand council of his marshals—Murat, Ney, and the rest, that his star had passed perihelion; it was here that he upbraided them for having grown soft in prosperity, and for opposing the invasion of Russia; and it was from Danzig that his legions "jumped off" for the ill-fated Moscow campaign.

In a later day Danzig was the background and the base for the northern shear of Mackensen's gray-green pincers that took Warsaw. Look at the map of the blunt salient that Russian Poland made into the heart of the central empires in the days before the war, and the strategic value of the fortified city in the rear of the invading Germans can readily be seen.

### LAME EVERY MORNING.

A Bad Back is Generally Worse in the Morning. Gettysburg People Are Finding Relief.

A back that aches all day and causes discomfort at night is usually worse in the morning. Makes you feel as if you hadn't slept at all.

You can't get rid of kidney backache, until you reach the cause—the kidneys. Doan's Kidney Pills are especially prepared for weakened or disordered kidneys—have been gratefully recommended by thousands.

Testimony of Gettysburg people proves the merit of Doan's.

John J. Tawney, 234 Baltimore St., Gettysburg, says: "I suffered off and on with rheumatic pains and kidney ailments. My back ached constantly and often in the morning I was so lame and stiff I could hardly get out of bed. My kidneys acted irregularly too. Someone advised me to try Doan's Kidney Pills and I got some at the People's Drug Store. I was surprised at the quick relief I received. I am not bothered by rheumatic pains now and I am in much better health all around."

OVER TWO YEARS LATER Mr. Tawney said: "I still use Doan's Kidney Pills, in fact, I always keep them in the house. I know if I take a few as soon as I have any symptoms of kidney trouble, I will be saved a great deal of suffering."

Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Tawney had. Foster-Milburn Co., Mfrs., Buffalo, N. Y.

## PEAKS ENTITLED TO FAME

European Families That Had More Than Ordinary Claims to World's Attention.

There is living at Bilbao, Spain, a family of seven who between them possess no fewer than 164 fingers. One of them has 23 fingers, another 21, while of the remaining five each can boast a couple of hands with 12 fingers apiece.

At Koshlivo, Russia, a very similar phenomenon exists in the fifty or more descendants of a peasant with extra fingers on his hands, who married at the beginning of the last century, all of whom are dowered with from one to five fingers in excess of the normal number.

The last surviving member of what was perhaps the record family with regard to weight was, in the person of Charles Atkins, a few years back interred at Harrow, England. He weighed 476 pounds, his brothers, who predeceased him, being no less than 504 and 560 pounds.

The family record for longevity has not been beaten since Robert Parr, the great-grandson of the celebrated Thomas Parr, died in 1757 at the age of one hundred and twenty-four. His father lived to celebrate his one hundred and ninth birthday, his grandfather reached one hundred and thirteen, while his great-grandfather was 152 at the time of his death.

There is mentioned in the Harleian Miscellany a Scotch weaver and his wife who were the proud parents of 62 children, 50 of whom reached their majority.

Large as this family was, its fame pales before that of a Russian, one Ivan Wassili, who was the proud father of 87. By his first wife he had 60 children in the following order: Four times quadruplets at a birth, seven times triplets and 16 times twins. By his second spouse he had twice triplets and six times twins.

Undoubtedly the record for misfortune belongs to a Belgian family named Adnet. The father, Jean Adnet, was drowned; his wife committed suicide, while of his two sisters one was killed by the kick of a horse and the other by a blow received from a falling scaffold.

Jean Adnet had six children, four sons and two daughters. Of these the latter perished through the overturning of a pleasure boat. One of the sons was stabbed in a drunken brawl, another was crushed to death by a heavy wagon, while the remaining two, who emigrated to America, were slain in 1891 while fighting for Balmaceda against congressists.—Stray Stories.

## Remarkable Twins.

Darius Cobb, artist, who died recently, and Cyrus Cobb, sculptor, were twins whose similarity, not only in external features but in the nature and development of their talents, is one of the most remarkable in scientific history. At fourteen both were painting views of the Mississippi river. At sixteen they were both leading orchestras, having simultaneously taken up the study of music. About the same time they both wrote poems for a paper published by the father, the Rev. Sylvanus Cobb.

When the twins were nineteen years old they started painting, professionally, Cyrus painting the portrait of their father and Darius that of their mother. At twenty they added lithographing to their accomplishments. In the Civil war they enlisted and fought side by side. At the close of the war came the first diversity in their activities. Cyrus then devoted himself to sculpture, designing a number of soldiers' monuments and historic figures. Darius became a historical painter. His head of Christ, upon which he labored 34 years, was regarded as his masterpiece.

## Far From Other Cities.

What is the most out-of-the-way place in the United States? A Utah man nominates Hanksville, in that state, for the distinction. Hanksville, he says, is the last postoffice for several hundred miles to the south and a hundred miles to the east. The mail that reaches there goes through so much hardship that the wrappings are usually worn out, for it must pass through the hands of three star route contractors before reaching its destination. A letter from Hanksville, he says, had just reached him at Green River, 90 miles away, which had been 16 days on the way.

## Used Theater Programs Cleaned.

Conservation has extended even to rumpied theater programs, left in the seats by the patron of a theater, according to Popular Mechanics Magazine. Between 200 and 300 are picked up each night, piled in stacks of 50 each, and pressed flat in a bookbinder's press for 24 hours. Emerging flat and unwrinkled from this process, they are then run through rubber rollers, which erase all fingerprints and stains. It is said that it is impossible to distinguish these reclaimed programs from those just off the printing press.

## The New Version.

"Gabe Gosnell got buncoed good and plenty on his trip," related Burt Blart of Petunia.

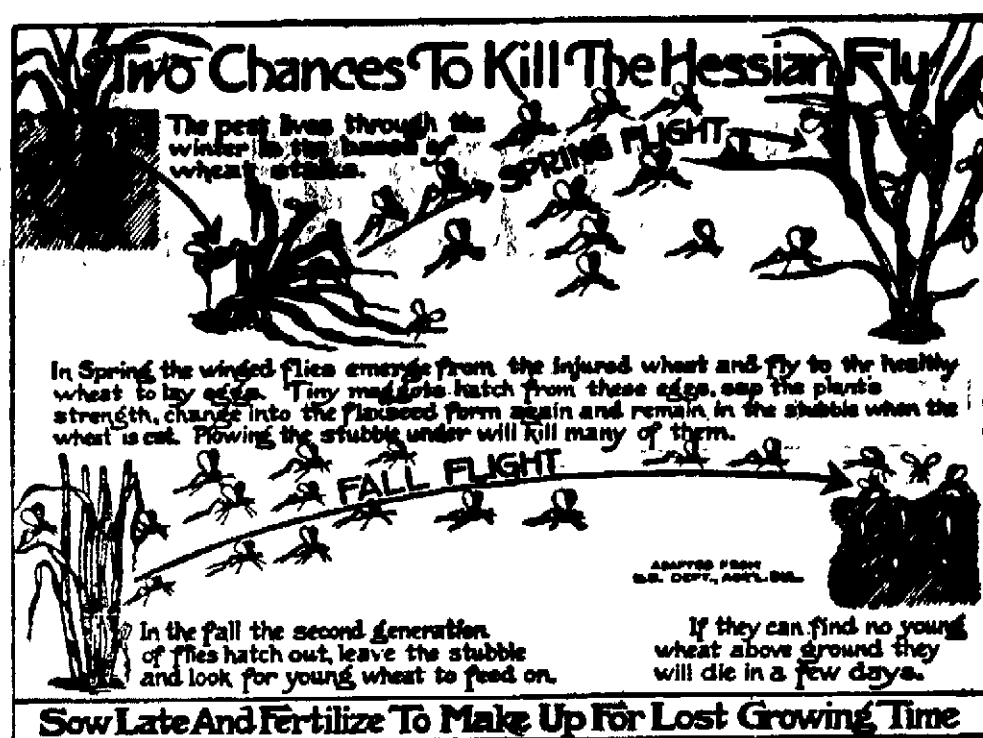

"Aw, well," returned old Riley Residew, "a fool and his money go to Kansas City."—Kansas City Star.

## Welcome Home Day.

"Papa," Billie asked, "is a trillion more than a billion?"

"Yes," Billie was answered.

"Then, papa, I'll bet there's a trillion people lookin' at the parade."

The illustration shows the two points in the life history of the Hessian fly where it can be destroyed most readily. Late seeding is an essential part of this program for eradication, which in turn necessitates the use of fertilizer, or other means of soil enrichment, in order to get the young plants through the winter in a vigorous condition.

## FERTILE SOIL A BIG FACTOR IN CROP PRODUCTION

Rich Soil Increases the Labor Efficiency of the Average Farm Hand.

Back in 1917 the extension department of the University of West Virginia made a census of the state with a view to learning what acreage of crops the average farm hand cared for. They found that on the better-class farms a man averaged to care for 26 acres of crops, 16 acres of meadow and 17 animal units.

Of course the fact that a man cultivates a certain number of acres has really but little bearing on the final question. It is the amount of crop

wheat), and 86,400 pounds of hay, straw and stover yearly. If, on the other hand, this same man were to spend his time growing crops where fertilizer amounting to 743 pounds per acre was applied each year, his total yearly crop production would mount up to 1,338 bushels of grain and 261,000 pounds of hay, straw and stover. The man working on improved land was able to produce three times as large a crop as the man working on ordinary soil. Not only is there a prac-

## On Unfertilized Land

## On Fertilized Land

A Fertile Soil Increases the Hired Man's Efficiency.

which he grows which really determines his value. Thus he must undertake a partnership with the soil, for it seems that the quality of the soil is even more important than the man himself in attaining the ultimate goal—big crops.

If we consider this average farm hand as applied to the ordinary unfertilized land as it exists at the West Virginia experiment station, we find that he is able to produce from the 43 acres 455 bushels of grain (corn and

tical effect through increasing the crop production per man, but there is a very decided moral effect on the man himself. Being human, the farm hand likes to work with thrifty luxuriant crops. He unconsciously puts forth his greatest efforts when he has before him the stimulus of a big yield.

He goes into a slump and gets disgruntled and discouraged with the prospect of a poor scrubby crop. Perhaps, after all, he is only reflecting the attitude of the man he works for.

## GROW MORE WHEAT AND CLOVER

Missouri Experiment Station Shows How Fertilization of Wheat Crop Increases Both the Yield of Wheat and the Next Year's Yield of Clover.

1. Legume.
2. Legume, Lime.
3. Legume, Lime, Phosphoric Acid, Nitrogen.
4. No Treatment.
5. Legume, Lime, Phosphoric Acid, Nitrogen and Potash.
6. Manure Alone.
7. Manure and Rock Phosphate.

The illustration above is drawn from a photograph in Bulletin 148 of the Missouri experiment station. It shows the result on the succeeding clover crop of fertilizer applied to wheat. The fertilizer not only increased the yield of wheat, and at a rate to pay for itself and leave a nice margin of profit, but in addition it made a big increase in the clover crop for the next year. A combination of legumes, lime and complete fertilizer produced the biggest gain, even greater than that produced by barnyard manure.

## THE ABANDONED FARM MOVING WESTWARD

In the May issue of the Agricultural Review, Prof. R. T. Throckmorton, Kansas experiment station, has the following to say regarding the maintenance of fertility in that state:

"Plantfood to the value of \$365,000,000 is being extracted from Kansas soils this year. This plantfood would produce 200,000,000 bushels of wheat. "Kansas soils are gradually but surely becoming unproductive, and the maintenance of soil fertility is a matter of concern to every farmer, particularly the wheat grower.

"In the face of the large number of abandoned farms and the rapidly increasing population, it is high time farmers began to do their work more scientifically."

"This is a warning which must be heeded—the barrel will soon run dry unless the draining at the spigot is replaced at least in part.

## ARGENTINA FIXES PRICE OF WHEAT

The Argentine government has fixed the minimum price for export wheat at \$1.55 per bushel. A rate of \$35 per ton of 2,240 pounds, equivalent to 84 cents per bushel, from Buenos Aires to New York, has been quoted by the United States shipping board. This would make the price of Argentine wheat at New York \$2.49 per bushel. According to International Institute of Agriculture at Rome the rate from Buenos Aires to Liverpool is 34 cents per bushel, which would make the price of Argentine wheat at Liverpool \$1.89 per bushel. In this connection it is interesting to note that the British government has fixed the sale price of imported wheat at \$2.40 per bushel.

It would seem from the above that the American farmer may well anticipate a good price for the 1920 wheat crop.

## THE WHEAT THAT DOES NOT WINTER-KILL

Every winter takes its toll of the wheat crop. Some winters destroy more, some less, but always there are thousands of acres of wheat plowed down each spring because so many of the wheat plants have been heaved out and destroyed. The causes of heaving are two.

The wheat may have been sown late or grown poorly in the fall, so that there is but a scant covering for the ground. Frost gets in and out comes the plant, roots and all. The wheat which makes poor top growth also makes a poor root growth, generally for the same reason—the soil is poor. A good root growth is as vital to the life of the plant over winter as is a good top growth. It serves as an anchor.

If the wheat is sown late and is not well and properly fed it grows slowly and winter catches it unprotected. The plant shown was drawn from a sample dug, washed and pictured on the same day as the one shown below. Incidentally the wheat plants were both sown on the same day. The difference is that the small and weak

Fertilized Wheat Plant Showing Tillering and Large Root Growth.

plant was not fertilized and the big husky plant was grown on a soil made rich by an application of high-grade fertilizer. The small plant was like all of its fellows. The big one was part of a mass which covered the soil and filled it so completely with roots that the frost had little chance to get in and no chance to do damage.

## HOOVER EXPECTS BIG EXPORTS OF AMERICAN GRAIN

Europe Needs Huge Shipments.

After surveying Europe's grain needs and possible sources of supply for 1919, Mr. Herbert Hoover gives figures which show that there will be need for every bushel America can spare.

Europe will have to import some 850,000,000 bushels of wheat and rye from the 1919 crop, and Mr. Hoover counts on approximately 450,000,000 bushels of this from the United States. When we recall that we exported only 270,000,000 bushels from our 1918 crop it becomes evident at once that even with a bumper crop this year every extra bushel will find a ready market across the water. This, of course means continued good prices.

The proper use of fertilizer at seed time will bring wheat through in vigorous condition even though planted late to avoid the Hessian fly.

## INCREASING WHEAT YIELDS

What the Ohio Experiment Station Has Learned.

Wheat yields are distressingly low in the United States—lower than in any of the other big wheat-producing countries except Russia and India. This fact did not attract much attention until we began to need wheat very badly and until the price of wheat went to \$2.00 or more per bushel. Farmers then began to ask, "How can we grow more per acre?"

The answer lies in reversing the condition which brought about the low yields. Fertility must be restored.

The Ohio experiment station has worked on this problem of increasing wheat yields for many years, and they have found that by the use of commercial fertilizer they can bring the yield up to respectable proportions—where it will pay a profit. The average yield of unfertilized plots on land which is typical of much of this country was 10.7 bushels per acre. A profit is hardly possible with a yield like that, even when the price of wheat is where it is today. When fertilizer was used to return the soil to something like its native fertility, the average of all yields was easily brought up to 24 bushels per acre. In many cases the yield was more than that, but the average of all was 24 bushels.

When we remember that no more time is consumed in plowing and fitting the land and but little more for harvesting the 24-bushel yield as compared with the 10-bushel yield, we can see how the profit mounts up as soon as we begin to grow better wheat.

## PATHETIC RUINS OF FRANCE

Once Pretty Villages Which Are as Dead as the Remains of the Roman Forum.

Most of the villages of northern France are as dead and cold as the ruins of the Roman forum—and not half so beautiful. Here were no great architectural splendors. No priceless art collections. They were nothing but plain, humble little hamlets of plain, hard-tilling peasants. The houses were destroyed and the simple, brave, hardy folks who owned them were also destroyed. The graveyards of the men I had seen at Soissons, Champagne, Verun, row upon silent row. Here were the graveyards of their homes, village after village, as dead as the men. The only difference was that the soldiers had been buried underground while these ghastly mutilated wrecks still remained exposed to view, writes Elizabeth Frazer in Saturday Evening Post.

There was more of this kind of scenery. And more. And more and more. And at last—so soon does the mind become sated by mere flat external spectacles of horror—I began to feel welling up inside of me a vague irritation against all these graveyards of gaping, mutilated specters of what had once been human habitations for being so monotonous, so, repetitional, so dumbly, blankly, possibly the same. I wanted them to get better or I wanted them to get worse—or I wanted them to be blotted clean off the map. Those mutilated corpses of towns, with their stark immobility, their contorted postures, their shattered members lying rigidly outstretched on the pavement, began to get on my nerves. They had the same stiff fixity, the same grotesque sprawl that one notes in a human corpse frightfully mutilated by a shell.

I had heard of men blown to pieces in battle and unrecognizable, even their identification plates gone. Here were their counterparts in hamlets. The lieutenant, searching his map, murmured doubtfully: "It might be A—or it might be B. It's hard to say."

These nameless ones I put into a list all by themselves and called them X. But presently I gave it up. It was too much like trying to count the volume of water in a reservoir by means of an eye dropper.

## Coconut Palm the Tropical Cow.

Copra consists of the dried meats of coconuts. It contains from 50 to 63 per cent of oil.

In India, Ceylon, China, the South Sea Islands and elsewhere the oil has been used as food since the dawn of history. For the fats contained in it are so much like the milk fats of mammals in most respects. It is already in wide use in this country as "nut margarine," which is coconut oil into which some butter has been melted and the whole churned with skim milk—that is, milk with the fats removed—and worked as ordinary butter.

## RECORD SEEMS HARD TO SET

Just What May Be Accomplished in One Working Day Shown to Be Variable Quantity.

The most difficult task of the coal commission, says London Answers, seems to be to discover how much coal cutting is a fair day's work for a collier. It appears that in a good "place" a man will cut four tons of coal in a shift, yet the yearly output of coal per man was only 220 tons last year.

It is rather interesting to glance at other forms of work, and to see just how much other toilers do in a day. Take plowing for instance. The man who, with a single plow, turns an acre in a day, is well earning his money. In completing his task he will have walked and guided the plow about fourteen miles.

Harvesting in the old days used to be slow work, and the man who cut by hand half an acre of wheat was doing well. With the modern horse-cutter and binder one man, with the assistance of two "shockers," has been known to cut and bind twenty acres of wheat in one day.

At one time the setting of three hundred bricks was considered a day's work for a bricklayer. But at place-work, and using a special soft mortar, a man has been known to lay 1,400 bricks during an 8-hour day and to continue this average for days on end.

Packing fruit is no easy task. Take oranges, for instance. These average 150 to the box, and each fruit has to be separately wrapped in paper. Seventy boxes is considered a very fair day's work, but a man has been known to pack 120 boxes in a 10-hour day. He had to handle and wrap 18,000 oranges to accomplish this task.

The work our men did in France when marching in full kit is far beyond that of an ordinary laborer. The world's marching record is held by a detachment of the London Rifle brigade. In April, 1914, these men—62 in number—marched from London to Brighton, a distance of 52 miles, in 14 hours and 23 minutes. They were in full kit, and carried rifles, a total weight of 42 pounds, yet not a man fell out.

## Some Good Out of War.

The geophone, a listening instrument developed by the French during the war to detect enemy underground mining operations, is to be used by our bureau of mines as a possible aid in locating miners who have been entombed after a disaster. A miner pounding on a coal seam can be heard with this instrument 1,200 feet away. Recently a pit boss who happened to be near while the geophone was being tested in a mine, put the instrument to his ears. He heard so distinctly that he called out in a startled tone: "Mack is stamping in a charge. We had better move away." A coal seam 300 feet thick separated Mack from the startled boss at the time.

## GOOD PRINTING

Can only be obtained in the best equipped office. That is why

## The COMPILER

Brand of Printing is used by the business men of the county.

## QUALITY

marks our printing with a style and distinctness all its own.

## THE PROOF

of the pudding is in the eating. This saying applies to good printing in the same manner.

### Professor Shoots Burglar.

Dr. Benjamin Franklin Schappelle, head of the Romance Languages at Gettysburg College for five years prior to 1916, and since then holding a position in the University of Pennsylvania and directing the Romance Language Department of the summer school of that institution, shot a masked burglar in the Alpha Chi Kappa fraternity house in Philadelphia, where he resided, early Monday mornin. Dr. Schappelle was awakened by a student occupying another room in the same house and told that there was a burglar in the house. Dr. Schappelle seized a 38 calibre revolver from his desk and met the masked burglar and both made the demand, "Throw up your hands." Dr. Schappelle says he saw his arms move and I knew he'd shoot me if I didn't shoot him first. I fired and I saw him fall." While the Dr. and student were arousing the police and neighbors the burglar crawled to a window and jumped out, breaking an ankle and arm and he worked himself across the street where he was found dead. The burglar has been identified as a medical student at the university and known to be a quiet student. Search of his room by police revealed about \$4000 of plunder gathered from fraternity houses and boarding houses. The same night a restaurant had been robbed of \$25 and that sum of money was on his bed.

### REPORT.

Of the condition of the Gettysburg National Bank, at Gettysburg, in the State of Pennsylvania, at the close of business June 30, 1919.

### RESOURCES.

Loans and discounts including rediscounts	\$837,085.81
Overdrafts, unsecured	610.30
U. S. bonds deposited to secure circulation (par value)	145,000.00

### ASSIGNEE'S SALE

### OF VALUABLE REAL ESTATE AND CRIST MILL; ALSO PERSONAL PROPERTY.

On Thursday, August 28, 1919.

The undersigned assignee for the benefit of the creditors of Jerry M. Biesecker, of Menallen township, Adams county, in pursuance of an order of sale to him directed, will offer at public sale in the premises the following valuable real estate, to wit: All that certain real estate, known as the "Arendt Mill Property" located in Menallen township, Adams county, Pa., along the "Narrows Road," about one mile west of Arendtsville, adjoining lands of the Eichholtz Brothers, James Cole, Wm. Eyster and others, containing about 33 acres, more or less, improved with a large frame Roller Mill, equipped with all modern machinery and in good condition, and saw mill attached; also two brick dwelling houses, frame barn and out buildings. A good apple orchard of several acres, in bearing condition on place, with plenty of good water, and fencing in fair condition. This is one of the best mill sites in the county and has been continuously operated.

At the same time and place the following personal property will be sold, viz:

One 16 horse-power steam engine, good as new, one hydraulic cider mill, used only two seasons and in good shape; set platform scales; office furniture, including stove, desk, chairs, and a lot of lumber, corn barrels, 1-2 bushel measures, scales, oil tank, ladders, cement, wheelbarrow, scythe and snath, digging irons, shovels, spring wagon and pole in good shape, one buggy, harness, chains, corn cultivator, shovel plows, forks, picks, ropes, three good shoats, will weigh about 175 lbs. each, one bay horse, 12 years old, work wherever hitched, also some household and kitchen furniture. Sale at 12 o'clock noon, when conditions will be made known by

DR. JAMES G. STOVER,  
Assignee,  
Bendersville, Pa.  
Wm. Hersh, Esq.,  
Atty. for Estate.

### EXECUTORS' SALE OF VALUABLE REAL ESTATE In Franklin Township.

On Tuesday, August 12, 1919.

The undersigned, executors of the last will and testament of Bernard I. Walker, late of Orrtanna, Adams Co., Pa., deceased, will offer at public sale on the premises, the following valuable real estate to wit:

1. All that certain Tract of Land situated in Franklin township, Adams county aforesaid, lying about one-half mile south of Flohr's Church and the Lincoln Highway, adjoining lands of Mary A. Snyder, John A. Shull, Bert Keller, John Musselman, Adam Deardorff and others, containing One Hundred and Fifty (150) Acres, more or less, of excellent farm land, improved with a two story brick dwelling house, large bank barn, and all necessary outbuildings, in fine shape and condition. Plenty of good water, fruit and shade trees, and convenient to churches, schools and markets. This is an ideal location, and the land is in a high state of cultivation, and a good producer. Purchaser will have right to landlord's share of the fall crop, by furnishing share of seed grains and fertilizers.

2. At the same time and place the undersigned will offer at public sale the following Mountain or Timber Lot, viz., a Tract of Land situated in Franklin township, Adams county, aforesaid, adjoining lands of Sheely Brothers, Oscar D. McMillan, J. M. Linn estate and others, containing 6 1-4 acres more or less. Some good timber on this tract, and at an accessible location. Sale on No. 1 at 1 o'clock P. M., when terms will be made known by

MINEVA I. WALKER

### NOTICE OF INQUEST.

In the matter of the partition of the real estate of Barbara Hanes, late of Hampton, Reading township, Adams county, Pa., deceased.

The heirs of said decedent will take notice that in pursuance of an order of the Orphans' Court of Adams County a writ of partition has issued from said court to the sheriff of said county returnable on Monday, the 23rd day of August A. D., 1919, and that the inquest will meet for the purpose of making partition of the real estate of said decedent on Monday, the 4th day of August, 1919, at 10 o'clock A. M. of said day upon the premises, at which time and place you can be present if you see proper.

The premises in question are described as follows: the undivided one-third interest in a certain lot of ground situated in Hampton, Reading township, Adams county, on the Public Square, being known as the Hanes property.

HOWARD J. HARTMAN,  
Sheriff.

### Cases of Summer Complaint.

Stomach and Intestinal disturbances are frequently corrected by the use of Mother Gray's Sweet Powders for Children. They tend to Cleanse the intestinal tract and promote digestion. Used by Mothers for over 30 years. All druggists sell them.

### ADMINISTRATRIX'S NOTICE

Notice is hereby given that letters of administration on the estate of Amos M. Fissel, late of the Township of Butler, Adams county, Pa., deceased, have been granted to the undersigned and all persons indebted are required to make immediate payment and those having claims to present them in legal form to

### PUBLIC SALE

### OF VALUABLE TOWN PROPERTY

On Saturday, July 26, 1919.

The undersigned, guardian of Kate O. Wolf, by virtue of an order of sale to him directed by the Court of Common Pleas of Adams county, will offer at public sale on the premises the following described valuable real estate:

A LOT OF GROUND in the Borough of Gettysburg, Adams county, Pa., at corner of York and Stratton streets fronting 60 feet on York street and running back to a public alley in the rear. This lot of ground is improved with a large three-story brick dwelling house, summer house and other buildings. This property is well adapted for use as an apartment house, or for business purposes, and constitutes one of the most desirable properties offered at public sale in Gettysburg for many years.

Persons desiring to inspect property can secure the key to the same by calling at the law offices of J. Donald Swope.

Sale will commence promptly at 1 o'clock P. M., when terms and conditions of sale will be made known by

D. M. WOLF,  
Guardian of Kate O. Wolf.  
J. DONALD SWOPE, Esq.,  
Attorney for Estate.

### EXECUTOR'S NOTICE

Notice is hereby given that letters testamentary on the estate of Ahmeda Wolf, late of the Borough of Abbottstown, Adams county, Pa., have been granted to the undersigned. All persons indebted to said estate will make payment of same, and those having claims present them at once to

# Portage Tires

Cord or Fabric  
6,000 Miles \* \* Ford Sizes 7,500 Miles

## Don't be Afraid to Pay Enough for Your Tires!

It's poor business to pay too little for tires, just as it's unwise to "buy cheaply" on clothing or furniture. Of course, any tire will give some service—but why fall short of full value when a few dollars extra will buy *all there is?*

Let's be real definite. Portage Tires are "good measure" Tires throughout—every cent you invest in them buys *full tire value*. Firm, uniformly-woven fabrics,

made from especially-selected cotton. Best-grade, new rubber—no "shoddy" or reclaimed stock. Painstaking, accurate work in the tire room; slow, deliberate, but absolutely *safe* vulcanizing and curing. Rigid inspection for defects—a Portage "first" is a first!

Portage builds for quality—then arrives at price by adding a fair operating profit to factory expense.

If you count *last cost* as well as *first cost* on tires, you will be interested in what we can tell you about Portage *Oversize Daisy Tread Tires*. Ask us for particulars—we'll be glad to have you come in any time.

## Stoner's Tire Repair Shop

129-131 Baltimore St., Opp. Post Office

Gettysburg, Pa.

## KEEP COOL

### Don't Fret.

Forget the weather and avoid thermometers and the sun. Live one day at a time. Eat little and drink moderately of water not too cold. Avoid heavy meats—be a vegetarian, if you can. But, above all,

SATURDAY, JULY 19, 1919.

#### Carlisle Pike on Sproul System.

Governor Sproul has signed the act of assembly placing the Carlisle pike on the Good Roads System of the State, and the State will assume the maintenance of the road. The \$10,000 subscribed for purchase of the pike is now due and payable and collection is being rushed in order to pay and open the pike next Tuesday, July 22. It is proposed to have a chopping down toll gate time on that date. All contributors are invited to make the trip in their own auto.

A luncheon will be served at Harrisburg with Highway Commissioner as the guest of honor. The party will take supper at the Altland House, Abbottstown. Both to be "Dutch treats."

After the purchase price has been paid over and all rights and deeds to the pike delivered to the committee, the caravan of machines will exercise a bit of authority over the newly acquired property. A lot of new axes will be carried along and these will be used to chop down all the toll gates between Hanover and Carlisle. Those old toll gates will give one last despairing gasp and quit cold. Then travel will be free on the old road which has been fettered for long decades.

#### Berlin and Hanover Pike.

It is alleged that the prospects are good for the funeral of the other pikes in Adams county by September 1st, and efforts are being made to close out the old pikes to the State at bargain prices. The East Berlin and Hanover pike for which \$65,000 was asked and \$40,000 offered has been submitted to the Highway Department a proposition that three engineers from without the State be employed to appraise the road, the State to pay any excess in price over \$65,000 which the engineers may quote, as well as the expense of the appraisal, if the appraisal is in excess of \$65,000, the turnpike company to accept any lower price than \$65,000, that may be appraised, and itself pay for the appraisal in that event.

#### Hanover and Littlestown Pike.

The Hanover and Littlestown Turnpike Road Company, which asked \$39,710 for its highway, and was offered \$30,000 by the State, has made a counter-proposal to sell for \$34,562.50, exclusive of toll house properties. The company, in a letter to Commissioner Hunter, states that the new price of \$34,562.50 is arrived at by splitting the difference between the asked and the bid price, and crediting in addition the estimated value of the toll house properties.

**McSherrystown and Hanover Road.**  
The McSherrystown and Hanover Turnpike Company, which asked \$18,000 for its property and was offered \$14,000, will, according to C. J. DeLone, if permitted to retain the toll house properties, reduce its price by a sum equivalent to their fair valuation.

#### MARRIAGES.

**Butt-Scherdel.**—Ralph Butt, son of Amos Butt, of Gettysburg, and Miss Ruth Scherdel, youngest daughter of Mr. and Mrs. William Scherdel, of Hanover, were married by her pastor, Rev. Ralph H. Bergstresser. The newly-weds will make their home in Gettysburg. Mr. Butt runs a motor bus between Gettysburg and Hanover.

**Bannerman-Torbert.**—Miss Ruth Torbert, who was a public stenographer at the store of Penrose Myers for three months during the summer of 1918, and Ralph Webb Bannerman, of Cleveland, Ohio, were recently married. The ceremony was performed in Detroit and the couple will reside in Cleveland, the home of the bridegroom.

**Resser-Weiler.**—Miss Edna Irene Weiler, daughter of Mr. and Mrs. Geo. Weiler, of Hanover, became the bride of Joseph H. Resser, also of Hanover, Thursday evening, Rev. R. H. Bergstresser performing the ceremony. The bridegroom is employed on a creamery farm near East Berlin.

**Kohl-Bream.**—On Thursday, July 17, at the home of the bride, Miss Ruth Bream, daughter of Mr. and Mrs. C. P. Bream, of Fairfield, and George H. Kohl, of Waynesboro, were united in marriage.

**Sebright-Wildasin.**—David G. Sebright, of East Berlin, and Miss Rosie M. Wildasin, of York Springs, were married at the Lutheran parsonage in Gettysburg July 12, by Rev. J. B. Baker.

# Tired Blood

That which is lacking in vitality, debilitated, weak and thin, cannot possibly give proper nourishment and strength—it must be purified, built up and vitalized by **HOOD'S SARSAPARILLA.**

#### NOTICE OF PRIMARY ELECTION

Office of County Commissioners of Adams County, Pa.

Gettysburg, Pa. July 19, 1919.  
In pursuance of an Act of Assembly, approved July 12, 1913, regulating Primary Elections, notice is hereby given to the Electors of Adams County, Pa., that on Tuesday, September 10, 1919, between the hours of 7:00 o'clock a. m. and 7:00 p. m., the fall primary will be held at the regular voting places in the respective districts of Adams county, Pa.

The various parties as provided for in said Act will nominate at said primary candidates for the following offices, to be voted for at the election held November 4, 1919.

Two (2) Justices of the Peace in each of the following districts: Franklin, Germany, Latimore, Oxford and Straban.

**DOGS ONCE WERE WORSHIPED**

Custom Practiced in Many Countries  
 in Past Ages—Ethiopia Had  
 One for a Monarch.

Dog worship spread from Egypt to  
 many other countries, where it took  
 different forms. The Romans sacri-  
 ficed dogs to Anubis, to the lesser dog  
 star, Procyon, and to Pan, and the  
 Greeks made similar offerings to pro-  
 pitiate Proserpine, Mars, Hecate and  
 other imaginary beings of whom they  
 stood in fear, says National Geographic  
 Magazine.

Plutarch says: "The circle which  
 touches and separates the two hemis-  
 pheres, and which on account of this  
 division has received the name of  
 horizon, is called Anubis. It is rep-  
 resented under the form of a dog be-  
 cause this animal watches during the  
 day and during the night."

Out of this idea it seems there arose  
 two mythical personages—Mercury, or  
 Hermes, and Cerberus, the three-headed  
 dog supposed to guard the gates of  
 hell.

But there were humbugs even in  
 those days, and they humbugged the  
 dog worshippers even as charlatans  
 often humbug Christians today. Per-  
 haps the limit of deception was prac-  
 ticed on a certain nation in Ethiopia,  
 which is said to have been bamboozled  
 into actually setting up a dog for its  
 king. Clad in royal robes and with a  
 crown upon his head, he sat upon his  
 throne and received the homage of  
 his subjects. He signified his ap-  
 proval by barking. He conferred hon-  
 ors upon a person by licking his hand,  
 and a growl might condemn a man  
 to captivity or death.

**Flying in Franklin's Day.**  
 Benjamin Franklin, who closely re-  
 ported the aerial experiments he view-  
 ed in France in 1783, wrote:

"The Improvement in the Construc-  
 tion and Management of the Balloons  
 had already made a rapid Progress;  
 and one cannot say how far it may go.  
 "A few Months since the idea of  
 Witches riding thro' the Air upon a  
 Broomstick, and that of Philosophers  
 upon a Bag of Smoke, would have ap-  
 peared equally impossible and ridicu-  
 lous.

"These Machines must always be  
 subject to be driven by the Winds.  
 Perhaps Mechanic Art may find easy  
 means to give them progressive Mo-  
 tion in a Calm, and to slant them a  
 little in the Wind."

**Truly Times Have Changed.**  
 A friend of Senator Sorghum en-  
 countered the solon on the steps of the  
 capitol and after passing the time of  
 day remarked playfully:

"Senator, how comes it you aren't  
 making any of your famous speeches  
 these days?"

But the senator was ready for him.  
 "Times have changed," he replied  
 without hesitation. "Now it isn't at all  
 easy for a man with silk hat and frock  
 coat to assert he is saving the coun-  
 try all by himself, and say it at an  
 audience that's all khaki uniforms and  
 overalls."

**WORLD RECORDS IN WHEAT  
 GROWING.**

The largest yield of wheat  
 ever recorded was 117.2 bushels  
 per acre. It was produced in  
 1905 in Island county, Washing-  
 ton, on an 18-acre field.

The largest yield of wheat  
 over a period of years of which  
 the world has any record is that  
 of 86 1/2 bushels per acre at the  
 Rothamsted experiment station  
 in England. This yield is the  
 average for a period of 90 years.  
 Ordinary unfertilized land in  
 England does not do that well.  
 In fact, the average yield of un-  
 fertilized land for the same pe-  
 riod of years was only 12 1/2  
 bushels. The extra 24 bushels  
 was the result of an annual ap-  
 plication of fertilizer containing  
 nitrogen, phosphoric acid and  
 potash.

**Heroes, Every One.**

In a section of the North Pennsylv-  
 ania street stands on Welcome Home  
 day, two women were much interested  
 in the drum-major's pigeon-toed course,  
 with his back forming a 45 degree an-  
 gle with the pavement.

"Ever" one of our soldier boys be-  
 lieved in his rights if he strutted like that  
 leader, with his stick at the head of  
 the band," one commented.

"Lawsy, all he needs is some feath-  
 ers an' he'd beat the sprucest turkey  
 gobbler I ever seen in all my born  
 days," her companion remarked.

A man next to them volunteered:  
 "Well, our boys ain't goin' to strut  
 any; but as you say, they all got a  
 license to; an' didn't they certainly  
 take the goose-step out of the German  
 army, when they chased 'em back  
 across the Rhine?"

"Ain't they the grandest heroes ever  
 was?" the first woman asked.

"Bet yer life," the man agreed with  
 pride.

"Yes, indeedy!" the other woman ex-  
 claimed.—Indianapolis News.

**A Stranger in the Woods.**

Years ago, when quite a youth, I  
 was rambling in the woods one Sun-  
 day with my brothers, gathering black  
 birch, wintergreens, etc., when, as we  
 reclined upon the ground, gazing vagu-  
 ely up into the trees, I caught sight of  
 a bird that paused a moment on a  
 branch above me, the like of which  
 I had never before seen or heard of.  
 It was probably the blue yellow-back-  
 ed warbler, as I have since found this  
 to be a common bird in those woods;  
 but to my young fancy it seemed like  
 some fairy bird, so curiously marked  
 was it, and so new and unexpected.  
 It seemed like an integral part of the  
 green beech woods. I saw it a mo-  
 ment as the flickering leaves parted,  
 noted the white spot in its wing, and  
 it was gone. How the thought of it  
 clung to me afterward! It was a rev-  
 elation. It was the first intimation I  
 had had that the woods we knew so  
 well held birds that we knew not at  
 all.—John Burroughs.

**SIMPLY COULD NOT FORGET**

Macaulay's Memory Could Only Be  
 Described as Marvellous—John  
 Bright a Close Second.

Talking of quickness in repartee a  
 story of Sydney Smith was cited I had  
 not yet heard. "Do tell me, Mr.  
 Smith," exclaimed a rather gushing  
 young lady, "what is dogmatism?"  
 "My dear young lady," he replied,  
 "dogmatism is only puppyism grown  
 older."

I remember at breakfast one day at  
 my father's, Lord Macaulay began to  
 repeat some trashy old historical bal-  
 lads, and so went on verse after verse  
 until my father exclaimed, "Why,  
 Macaulay, how can you have com-  
 mitted all that rubbish to memory?  
 What utter waste of time!" "Com-  
 mitted to memory!" cried Macaulay.  
 "I only wish I could forget it. I sim-  
 ply glanced over those verses when  
 standing at a bookstall one day." If I  
 remember rightly, he said at the same  
 time that if the first four books of  
 Milton's "Paradise Lost" were de-  
 stroyed, he could reproduce them word  
 for word.

Mr. Bright and Mr. Longfellow met  
 each other for the first time at our  
 breakfast table and were mightily de-  
 lighted with each other. Again the  
 conversation turned upon memory, and  
 John Bright asked Mr. Longfellow  
 whether he could identify and claim  
 every line of poetry he had ever writ-  
 ten. Mr. Longfellow thought he could  
 not. Then he in turn put the question  
 —would Mr. Bright be able to identify  
 every one of the speeches he had made?  
 "Yes," said Mr. Bright, "not every  
 passage, perhaps, taken by itself, but  
 given a certain amount of the context  
 I undoubtedly could." —From "The  
 Notebook of a Spinster Lady."

**Find a Moth Exterminator.**

Experiments of the bureau of ento-  
 mology, United States department of  
 agriculture, have demonstrated that  
 naphthalene is uniformly effective in  
 protecting woollens from clothes moth  
 infection and in killing all stages of  
 the insect. A red cedar chest readily  
 killed all adult moths and showed con-  
 siderable killing effect upon young  
 larvae. It did not prevent the hatch-  
 ing of eggs, but killed all the result-  
 ing larvae almost immediately. Red  
 cedar chips and shavings, while not en-  
 tirely effective in keeping the adult  
 moths from laying eggs on the flannel  
 treated, appeared to protect it from  
 appreciable damage when used lib-  
 erally.—Des Moines Register.

**Farm and Country.**

Secretary Daniels said at a dinner:  
 "When the layman tries to talk nat-  
 urally he makes as many mistakes as  
 the city girl on the farm."

"This city girl was smoking her  
 after-dinner cigarette in the hammock  
 on the lawn when a cow began to low  
 mournfully. The city girl blew a  
 smoke cloud into the air and said:  
 "Listen to that poor beller mewing  
 for her colt!"

**FERTILIZE LIBERALLY**

Says Professor Agos.

"I am convinced that the av-  
 erage individual loses his chance  
 for the largest net income from  
 land by failure to fertilize lib-  
 erally. When one lacks capital  
 it is perhaps a serious matter  
 to run up a big bill for fertil-  
 izers, but when labor and seeds  
 are to be risked it is poor busi-  
 ness not to have enough plant  
 food to make a good crop. Poor  
 land does not get one anywhere  
 —at least in the direction he  
 wants to travel."—Alva Agos,  
 in National Stockman and  
 Farmer.

**Grieving Cows.**

An Essex correspondent of the Lon-  
 don Daily Mail writes: This morning  
 I witnessed a strange sight in which a  
 herd of cows, an old bull and a few  
 calves took part in a meadow near my  
 house.

A cow that had recently calved died  
 in the night and yesterday morning  
 lay out stiff on the frosted grass be-  
 neath a tree. During the day cows  
 roamed near the place and stopped to  
 smell and lick the side and face of  
 the dead animal. Not till this morn-  
 ing did the knacker's cart arrive to  
 carry the body away.

When the vehicle was drawn to the  
 spot the whole herd came slowly up  
 and stood round watching intently,  
 with heads down, and an indescrib-  
 able expression, which seemed half  
 questioning and half sympathetic, in  
 their eyes. Seven of them and the  
 old bull came up and licked the dead  
 cow's face, in one instance as it was  
 being hoisted into the cart. When it  
 was taken away they stood watching  
 it to the far side of the meadow and  
 through the gate till they could see it  
 no longer. Then they smelted all over  
 the spot where it had lain.

**Two Hundred Years Ago.**

"And herein it is that I take upon me  
 to make such a bold assertion that all  
 the world are mistaken in their prac-  
 tice about women; for I cannot think  
 that God Almighty made them . . .  
 so glorious creatures . . . with  
 souls capable of the same accomplish-  
 ments with men, and all to be only  
 stewards of our houses, cooks, and  
 slaves." This advanced doctrine, which  
 in its climax sounds somewhat as if it  
 were uttered in a present day conven-  
 tion, was written, as is noted in a re-  
 cent book on English literature, some  
 two hundred years ago, by Daniel  
 Defoe.—Outlook.

**Street Car Statistics.**

According to a preliminary report  
 issued by the bureau of the census, de-  
 partment of commerce the street and  
 interurban railways of the United  
 States during the year 1917 transport-  
 ed over 11,000,000,000 fare paying pas-  
 sengers, representing an average of  
 something more than 100 trips for each  
 man, woman and child in the United  
 States.

## Stanley's Water Lily

By JANE OSBORN

(Copyright, 1919, by the McClure Newspaper Syndicate.)

"And down that lane you get to the bungalow of Tom Stanley, the water lily man—water lilies, pond lilies or whatever you call them. He calls them nymphs, if that is the way you pronounce the botanical name." This was part of the information that Mrs. Bob Manning gave her house guest, Fay McLeod, on the first of her week ends at the Manning country cottage.

"So, you see, we haven't very many eligible bachelors for you, Fay," she went on, "though, truly, I imagine that Mr. Stanley is nice enough aside from the pond lilies. He's a professor at one of the colleges in the winter, though his property would make him independent if he chose. At least, he's harmless and quite good looking and you can see how you like him. We've asked him up for the little dance to-night."

Perhaps the fact that Fay was getting all her vacation in those week ends at the summer place of her old friend, Mrs. Bob Manning, that summer, and that what diversion she had from the grind of directing a playground in one of the crowded city neighborhoods had to be derived from Saturday noon to Monday morning, accounted for the fact that she showed less than her usual reserve when she met Mr. Tom Stanley and the other guests at the Bob Mannings' Saturday night dance.

"It must be a fascinating study," she told Tom, as she brought up the subject of his hobby that her hostess had told her about. "There are some that bloom only at night, aren't there?" Tom uttered an affirmative, but without digression on the subject of nymphs, for at that particular moment the delicate curve of Fay McLeod's lips and the delicate rounding of her chin seemed of vastly more interest than all the night-blooming water lilies in the world. He had an absurd desire to tell her about it.

"I have always longed to see a lotus," went on Fay, heroically trying to continue the conversation. Usually when all other devices failed one could talk on a man's hobby with results, but this time the rule was failing. "There must be something inexplicably lovely about them. Yet, I suppose they never grow in this climate?"

"So you are interested in them, too," said Tom Stanley, recalling himself. "Most people find them rather stupid. Really, I do wish you could get up an interest in the subject, because if you did then perhaps you wouldn't find me so dull as I am afraid you would otherwise. What a jolly thing it would be if I could make myself a really interesting friend to—a girl like you."

"I really do wish some nice girl could take that Mr. Tom Stanley in hand and marry him," sighed Mrs. Bob Manning over Sunday morning breakfast with her husband and Fay. She had told her husband her plans beforehand and had coached him on what he should say.

"He really is a fine chap," he explained. But he had been much absorbed in his shaving when his wife had coached him, and he had forgotten the details of the instruction. "Say Fay," he said, "why don't you marry him? He seemed immensely taken with you when he asked me when you were coming again and all about you. You might as well be spending his money as having him squander it all on those infernal water weeds of his. He spends all his stray time moping through the marshes looking for them, and not content with what he gets that way he spends thousands of dollars having roots imported from Egypt and other God-forsaken places. Why what he spends on those weeds would support half a dozen wives."

The days that followed were gloomy ones for Tom Stanley. He was pessimistic from the first about Fay. He knew well enough that she was the girl whom he would want to marry, but he felt no security at all in his method of courtship.

Now, if it was a new sort of water nymph that he was in search of that would have been different. That was a matter of patient search through the marshes communication with his agent and then careful cultivation on his own part. But wooing a wife was something that he felt he knew nothing about.

It was after they had known each other for three week ends that Stanley decided he could endure the suspense no longer. He determined to ask her that week end to be his wife. Stanley met Fay at the small station where those who visit that section of the country must get off and ran her over in his roadster to the Bob Mannings' house.

"Are you going to let me stick around this afternoon?" he asked Fay as soon as he had reached their destination.

Fay assured him that she would much rather have him come that night and ordered him playfully to let her and Mrs. Bob amuse themselves alone during the afternoon.

"Bob has some new dance records I thought we could try," said the plotting hostess, "so be sure to come back for dinner."

"Oh, if you don't awfully mind I have a walk I want to go this evening with Tom," interrupted Fay. "There'll be time for dancing besides, and I

can't tell you what it is. It's a surprise," she said, looking at Tom.

Tom hesitated for a moment, but his mind was made up. "I'm awfully sorry—I had some business to attend to to-night. It has to be done tonight," he said. "If I could come for dinner and tear myself away later—and then I'm counting on having you all up for supper at my place Sunday. Aunt Mandy's promised us something special."

Fay protested and Mrs. Bob retreated. Fay begged to be told what his business was, she pouted and said she was jealous. Tom didn't tell her, because he felt that she would not realize that business such as that could claim him. Finally it was agreed, however.

His business, he told her, meant a solitary hour or so spent in the woodland swamp, and strangely enough so did hers. So, after dinner they ventured forth, both donning rubber boots before they went, and Stanley taking a lantern, in case the moon should be hidden by one of the clouds that were rising in the misty sky.

The fact was that for several weeks now there had been thieving going on. There were some water lily roots which Stanley had been cultivating—in fact, he had been the first to establish them in this climate—that had been stolen from a stretch of marshland that was a part of his land. Always the theft took place on Saturday night. His man had tried to discover the thief, and then for a week Tom had patrolled the marshes, but he felt that as the theft had taken place on the three preceding Saturdays he would have better success if he sought the thief on that night.

"We must walk up through this thicket first," said Fay when they started out. "I'll tell you now it is a beautiful surprise. You told me you would like it if I studied up on water lilies. Well, I have been doing it, and I've been scouting around and I've found some most beautiful pink ones that come out only at night. I pulled some up last week and the other week ends, and I wanted first to find out what they were before I showed them to you. But I couldn't. Besides, they always close when I get home. So I wanted to take you to them."

"Did you manage to pull them up by the roots?" asked Stanley, with a catch in his voice that Fay did not detect. They were, he saw, the roots that it had cost him so much in money and patience to establish.

"Yes, I got root and all, because I thought that would help me to identify them. It was hard, but I did it."

"Don't let's pull that one up," suggested Stanley as Fay pointed out the last of his most choice roots that he had imported from the ends of the world. "Let's leave it there so we can always come back and see it."

"And now let's attend to your business," said Fay, rather disappointed that Stanley had shown no more enthusiasm, but blissfully ignorant of the real situation.

"Oh, my business," echoed Stanley. "Why, for that matter, it is quite settled. Perhaps the reason I wanted to bring you out in these woods was because it would seem a little easier to ask the girl I love to marry me right here—in this misty moonlight."

And Fay agreed with him.

**Dead Sea Is Alive.**  
The Dead Sea isn't really dead, after all. Ancient writers established a myth that it was an abode of death, that nothing could live on its shores, and even the birds flying over it would drop dead.

But all this has been disproved by a well-known scientist, Dr. E. W. G. Masterman. He says that it is true that nothing can flourish where the waters are deepest because of the salt, but near the shores, where the water is brackish, small fish, crabs, etc., are found.

A few years ago a crowd of tourists saw fish swimming about in the sea and they signed a declaration to this effect. And at many spots along the shore acres of reeds and trees flourish, and in these places animal and bird life is abundant.

**Damascus Is Oldest City.**

Twenty-seven centuries have passed into history since the founding of Rome. Damascus was an ancient city when the Roman empire was founded. The mysterious pyramids and the still more mysterious and awe-inspiring sphinx have reared their towering and massive outlines above the shifting sands of Egypt for more than 3,000 years. Damascus is older than they are. Compared to Damascus the great wall of China is a work of modern construction, and this also applies to the cities of northern and western Europe, while the oldest cities of the western hemisphere are as saplings compared to an old oak.

**Brass Best Alloy.**

Brass is perhaps the best-known and most useful alloy. It is formed by fusing together copper and zinc. Different proportions of these metals produce brasses possessing very marked distinctive properties. The proportions of the different ingredients are seldom precisely alike; these depend upon the requirements of various uses for which the alloys are intended. Peculiar qualities of the constituent metals also exercise influence on the results.

**Fearing the Worst.**

"Is that lunch counter patron crazy?" "Not a bit of it. He's wise in his generation."

"But what was he muttering to himself?"

"Mud-cat by all other names is still mud-cat." He has just ordered tenderloin of trout.—Birmingham Age-Herald.

## WILL "MAKE GOOD"

Spirit That Animates the Returning Soldiers.

Men Who Gloriously Finished the Greatest War in History Have Now But One Idea: Their Country's Good.

The American soldier in the great war dedicated his life to the establishment of justice, freedom and democracy in the world. Analytical wise guys have been busy ever since America got into the war, furnishing cynical explanations of the American fighting man's impelling motive.

In spite of the complex arguments of the analytical psychologists who can understand anything but the simple sincerity of an honest man, the American soldier did fight in war for the establishment of those principles, and has every intention of working in peace for the preservation of that for which he fought.

I talked of the purposes of the American Legion with Colonel Roosevelt. In his conversation, as he explained them to me, the word "crystallization" occurred again and again.

"We want," he said, "to crystallize the spirit that made it possible for us to get into this war and to fight it as we did."

Do you realize, you who read this, what that spirit is that this organization wants to crystallize and preserve? I'll give you an example of it that I saw.

A shattered church in the Marne salient during the latter part of July: It was filled with freshly-wounded on stretchers. The shells were whining over and hurrying about it. A slim, big-eyed, very boyish boy was brought in all shot to pieces. He was a very ordinary American boy, certainly not more than eighteen. A medical major was passing.

"Hey, doc," the young fellow called weakly.

"What is it, son?" the major asked, bending above him.

"Tell me, doc," the boy begged huskily. "Am I—am I—bad hit?"

The major looked at the descriptive slip with which the wounded boy was tagged and hesitated. He knew the young fellow had less than half an hour of life left in him.

"Well, I'll tell you, son," he said slowly. "You're in a pretty bad way, but we're going to do all we can for you."

The boy—who was a very ordinary young fellow, as I have said—saw the truth under the thin camouflage of kindness.

He knew he was dead. He caught his breath quickly, closed his eyes, and, reaching up, caught hold of the major's hand and held it tight for a little time.

Then he sighed, opened his eyes, and folded his arms contentedly on his breast. He looked up at the major, and there was the calm light of a glad resignation on his face.

"Well, anyhow," he whispered triumphantly, "I guess I made good, didn't I?"

"You sure did, son," the major assured him.

The boy smiled again and died, happy in the knowledge that he had made good in his personal obligation to establish the principles of justice, freedom and democracy.

That's the spirit that the American Legion wants to crystallize, to perpetuate, to preserve and translate into terms of constructive civilian effort that will insure the continuation in force of the principles that the soldier fought to save.—William Slavens McNutt in Collier's Weekly.

**The Italian Farmer.**

The Italian farmer is evidently nothing if not willing to experiment. No fewer than three classes of collective farms are in successful operation in the country. In one class a co-operative society of farmers acts as landlord for the individual members, each of whom tills his own farm independently of the others. Under the second plan the co-operative society holds the land, decides from year to year how it is to be divided and cultivated, and appoints each member to his part in the program of cultivation. The third plan is more complicated: the co-operative society rents a large farm which is worked by a permanent staff of members receiving a salary for their services, and by other members who divide their time between work on the co-operative farm and on privately owned farms. All three forms of co-operation are highly successful according to recent accounts. They have this point in common, the elimination of middlemen between farmer and consumer.

**Ivory "Mines."**

Lieutenant Schenute, who was a member of a United States naval expedition sent into the Arctic in search of the exploration ship Jeannette, reports the discovery of Ivory "mines" in a group of islands lying northeast of the Lena river, situated in northeast Siberia. Vast numbers of mammoths, it appears, have been discovered buried in a sea of ice, and it is held that, for a short period each year, probably a few weeks, these mammoths could be "mined" with great profit, owing to the immensity of the tusks, four times the size of those of the elephant of this age, and because of the great value of ivory at present. An ivory "mining" expedition would doubtless furnish all the "thrill" that the most adventurous could possibly desire.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts on the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.

F. J. CHENEY & CO., Toledo, Ohio.

Sold by Druggists, 75c.

Hall's Family Pills for constipation.

Evangeline Rice, daughter of Dr. and Mrs. A. C. Rice, of McSherrystown, while crossing the street one day recently, was hit by a bicycle and knocked to the ground suffering a number of cuts and scratches.

## FOLEY KIDNEY PILLS

FOR BACKACHE KIDNEYS AND BLADDER

Advertisement.

The Huntington township school board has purchased an acre of ground from Harry Whitcomb at the forks of the road near Wierman's Mill where they will build a new school house. At a meeting of the school board on Monday John Burgard of East Berlin, was awarded the contract for the cement and stone work.

## FOLEY CATHARTIC TABLETS

Keep Stomach Sweet—Liver Active—Bowels Regular

Advertisement.

C. G. Chronister, of East Berlin, cut an ugly gash in his right cheek while cranking the gasoline engine at the "News" office. It took three stitches to close the wound.

Harsh physics react, weaken the bowels, will lead to chronic constipation. Doan's Regulets operate easily, 30c. a box at all stores.

Mr. and Mrs. Charles Musselman, of McKnightstown, have received word that their son, Private C. D. Musselman, has arrived safely in New York from overseas. He was a member of Co. B, 413th Telegraph Battalion.

## Hay Fever-Catarrh

Relief of Catarrh

SCHIFFMANN'S CATARRH BALM

Advertisement.

A 1919 Ford Sedan belonging to Rolandis Feeser of near Cedar Ridge was stolen from his garage last Wednesday night.

Accidents will happen, but the best regulated families keep Dr. Thomas' Eucetic Oil for such emergencies. Two sizes, 30c and 60c, at all stores.

On Tuesday the Eagle Hotel in New Oxford, which was recently purchased by Nevil M. Dicks, of that place, was taken over by the new owner. Mr. Dicks will make a number of changes and improvements in and about the place, and put it into first-class shape for his restaurant and hotel trade. The stable will be made a modern garage and will be managed by R. C. Wolf.

A healthy man is a king in his own right; an unhealthy man an unhappy slave. For impure blood and sluggish liver, use Burdock Blood Bitters. On the market 35 years. \$1.25 a bottle.

Counties of Pennsylvania are now divided into classes according to population under the terms of the bill approved by Gov. Sproul. The new law makes eight classes, and Adams comes in the seventh class which is counties with 20,000 to 50,000 population.

Itch! Itch! Itch! Scratch! Scratch! Scratch! The more you scratch, the more you itch. Try Doan's Ointment. For eczema, any skin itching, 60c. a box.

J. H. Sell, cattle dealer of Hanover, had the remarkable experience of escaping uninjured when lightning struck a taxi in which he was riding, and so seriously injured the colored driver that the man will die. The accident happened in Charlestown, W. Va. Mr. Sell was not hurt but the driver ran the car a square before he collapsed.

## Ambition

Tired Men and Women who "feel old before their time," who are languid, have no energy and lack ambition—these are often sufferers from kidney trouble.

Weak, overworked or diseased kidneys are indicated by ambles, always tired, nervous condition, by sallowness of skin and puffiness under eyes, backache, stiff joints, sore muscles, or rheumatic pains.

## Foley Kidney Pills

are right at the cause of suffering and misery, regulate the kidneys and bladder and restore to sound and healthy condition.

N. R. Reese, Dublin, Ga., writes: "I want to say I am better. Before I started to take Foley Kidney Pills I could not turn over in the bed. I had such severe pain in my back and hips, that I could not bend over and I had to get up at night five or six times. By taking Foley Kidney Pills I am up and able to do to work."

For sale by People's Drug Store.

An Old Reliable Remedy for Children  
Mother Gray's Sweet Powders for Children have been used by Mothers for over 30 years for feverishness, Bad Stomach, Teething Disorders and Headache. They break up colds in 24 hours, move and regulate the bowels and destroy worms. Get a package at your druggists to use when needed.

## A Grateful Woman's Story.

Mrs. Robert Blair, 401 S. 20th St., Terre Haute, Ind., writes, "After taking Foley Kidney Pills a few weeks I found my kidney trouble gradually disappearing. The backache stopped and I am also free from those tired spells and headaches and my vision is no longer blurred." They stop rheumatic pains. Sold everywhere.

## 79th Division Reunion.

Former soldiers of the 79th Division will hold a big celebration in Philadelphia during the first week of October, according to plans already started. The event will be held in honor of the division's work overseas. Former members from all parts of Pennsylvania, Maryland, New Jersey and Delaware are expected to attend.

Have you used Dr. Fahrney's Teething Syrup? It is the whole thing. Babies like it. Cures all stomach troubles.

Deputy Revenue Collector Smarsh, of Gettysburg, has received forms for the war tax on ice cream and sodas and also for jewelry. This tax must be paid before July 20 or a penalty of twenty-five per cent will be added.

## You Need Not Travel.

It is safe to say that as many persons have secured relief from hay fever and asthma at home by taking Foley's Honey and Tar as have been benefited by going to health resorts. It heals and soothes the choking, "stuffed-up" sensation. Good for all colds, coughs and croup. Contains no opiates. Sold everywhere.

A counterfeit \$1000 note, bearing the vignette of Grover Cleveland, is said to be in wide circulation in this State. Look out for it.

On last Saturday Charles Fogle, of Harney, was hurt very badly by a hay fork rope which tore and struck him in the forehead. Also, Robert Angell, young son of Harry Angell, was cut badly about the face. Both required medical aid.

## Mrs. Burns' Letter.

Here is a letter that is certain to prove of interest to people in this vicinity, as cases of this sort occur in almost every neighborhood, and people should know what to do in like circumstances:

Savannah, Mo., Oct. 12, 1916.  
"I used a bottle of Chamberlain's Colic and Diarrhoea Remedy about nine years ago and it cured me of flux (dysentery). I had another attack of the same complaint some three or four years ago and a few doses of this remedy cured me. I have recommended Chamberlain's Colic and Diarrhoea Remedy to dozens of people since I first used it." For sale by People's Drug Store.

On last Saturday evening the barn wagon shed and hog pen at the home of Mr. and Mrs. Wm. H. Fox at Harney, were completely destroyed by fire. The cause is unknown.

During the heavy storm last Sunday Opossum Creek at Centre Mills overflowed its banks surrounding the houses of T. F. Rhodes and Willis McCans. It also did considerable damage to Mr. Fraim's farm, carrying away a field of wheat. A horse and cow belonging to Mr. Chronister were carried down stream.

## The Joy of Living.

To enjoy life we must have good health. No one can reasonably hope to get much real pleasure out of life when his bowels are clogged a good share of the time and the poisons that should be expelled are absorbed into the system, producing headache and indigestion. A few doses of Chamberlain's Tablets will move the bowels, strengthen the digestion and give you a chance to realize the real joy of living. Try it. People's Drug Store.

Hoffman Orphanage will receive \$500 according to the provisions of the will of the late Israel Forscht, of York, which was admitted to probate in that city on Monday. The bequests are all to be paid at the death of his widow for whom a trust fund is created by the terms of the will.

During the storm Sunday evening at the farm of Stanley Smith, in Pleasant township, Adams county, 100 chickens were killed by the rain and hail.

## The Test That Tells.

There is only one real test for cough remedy, and that is use. S. Oliver, Box 192 R. F. D. 5, Greerboro, S. C., writes: "Foley's Honey and Tar is just fine. I keep it in house all the time. It soothes and relieves hay fever, asthma, colds, croup, and bronchial afflictions. Sold everywhere."

Fairfield is suffering from a epidemic of whooping cough. Many of the younger children are afflicted with the disease and a number of houses have been quarantined.

## Dangers of Hot Weather.

Anyone is doubly liable to ill effects from the hot sun when stomach and bowels are clogged with a mass of undigested food. If you suffer from sick headache, biliousness, bloating, "heaviness" or any ill caused by indigestion, take a Foley's Cathartic Tablet and you will feel better in the morning. Sold everywhere.

Frank Billman, near New Oxford, sold his residence and two acres land to Milton Butt, Phillipsburg, Pa., for \$1600. Possession April 1920. Mr. Butt will go into chicken business.

## Lame Shoulder.

This ailment is usually caused by rheumatism of the muscles. All that is needed is absolute rest and a few applications of Chamberlain's Liniment. Try it. People's Drug Store.

Fifty-four battlefield guides, of one-half the number operating, Gettysburg in former years, have paid their license fees.

## Chamberlain's Tablets.

These tablets are intended especially for stomach troubles, biliousness and constipation. If you have any troubles of this sort, give them a trial and realize for yourself what a first class medicine will do for you. They only cost a quarter. People's Drug Store.
